Spring Lecture Series N.12
Operators on Martingales (1987)

Principal Lecturer: Donald Burkholer, University of Illinois

Contributions By:

T. McConnel

Title: Decoupling inequalities: A survey of recent progress

A. Bennett

Title: Martingale Transforms of type (p,q)

G. Edgar

Title: Complex Martingales and complex uniform convexity

D. Deblassie

Title: L^p inequalities for stopping times of diffusions

J. Chao

Title: A generalization of Martingale Transform

J. Pipher

Title: Two parameter martingales and exponential integrability

N. Frangos

Title: Some inequalities for strong martingales

S. Dilworth

Title: Random Variables and rearrangement invariant norm

B. Davis

Title: Conditional Brownian motion in planar domains

J. Daly

Title: Factorization of H^p Spaces on simple Martingales

O. Blasco

Title: UMD spaces related to vector valued Hardy spaces

R. Banuelos

Title: On the VP
